

PIURE.
CREATING LIVING SPACE

Welcome to Piure

Piure designs sophisticated furniture featuring a luxurious simplicity and many beautiful details.

Design

Our elaborate designs are aimed at making your home more beautiful and you just that little bit happier. Our home is a central part of our life. A wonderful place to express ourselves, to maintain friendships, to wind down and to concentrate on the essential things in life.

Sustainability

But we don't just want to build beautiful furniture. We also want to do so in a way that serves the people in our society. We manufacture durable products and conserve resources. We use environmentally friendly materials and technologies and source 80% of our materials from Germany and 20% from Europe. The materials we use are all certified according to EU directives. We manufacture exclusively in Germany, because we attach importance to correct working conditions, – at our company, but also at partners and suppliers. That has quality for us.

Configuration

Our high product and material variety enables you to design your desired furniture based on our system. With our configurators (see p. 128) you can playfully discover the endless possibilities. You can rotate the high-end visualizations of your furniture design as you wish, open the fronts and try out our wide range of interior design options. An integrated price calculation and your individual configuration protocol allows you to discuss your desired design with a Piure partner.

We hope you enjoy the following pages!

Nex Sideboard – Minimalist, luxurious and elegant.

Nothing overdone, and nothing underdone. The interplay of surfaces and lines is held in exciting proportion and marked by luxurious reserve. The wafer-thin tops and exteriors are elaborately mitred and perfectly matched, framing the carcass with a filigree shadow gap, which we give a clear, delicately crafted design. Fineness at first glance.

The planning philosophy of Nex Sideboard is based on a flexible corpus system. The corpus with many front functions are available in 7 heights, 9 widths and 2 depths. The corpus can be stacked side by side or on top of each other depending on your functional needs. All visible components are available in matt lacquer, high gloss, veneer or glass and in many colors, and you can mix everything as you wish. For the tops, some of which are up to 360 cm in length, we also offer a fine stone ceramic or glass.

The minimalistic design of the Nex sideboard perfectly accentuates noble materials and high-quality workmanship. The choice of corpus creates exciting play of lines. Each visible element can be chosen in its own color and finish, from completely monochrome to pop art. Thus, centrally placed glass fronts, set brilliant effects. Precious woods give the sideboards a special warmth.

Nex sideboards can be placed upright, wall-mounted or even freestanding in the center of the room. Aesthetic, atmospheric and perimeter LED lighting for wall-mounted sideboards enhances the luxurious touch.

The open compartments beautifully emphasize the visible and invisible storage space. They can be integrated in any position, tone on tone or with an accent color or veneer finish. The edge of the open compartment is elaborately beveled and integrates visually wonderful next to closed fronts. So you have your important things and pieces quickly at hand.

You can order the Nex Sideboard with a handleless touch system or with fine recessed grip. It's possible to set a color accent with the seamlessly integrated aluminium strip placed in the recess. In the example shown, it is lacquered darker than the color of the sideboard – but you can choose any color you like.

Our Nex Sideboard interprets this in the form of a cube – pure, clear and extremely sophisticated. As well as in many luxurious details. For example, with the precisely fitted metal insert in the top panel. The recessed section “floats” delicately above the piece of furniture, separated only by a subtle shadow gap and accentuated by the fine alternation of materials and colors. The Twin Box also underscores this special character. At the top right or left there is a hollow space which provides room for a drawer element.

Backlit Parsol glass doors, TV solutions, individual cutouts for cable management or special dimensions – the configurable furniture leaves nothing to be desired.

Edit – Smart, modern, flexible.

Edit is a modular sideboard program that you can design according to your ideas. The exclusive mix of materials creates a surprising furniture for your living space. The fineness of the lines and the 5 mm mitered framing testify to our high-quality manufacturing. We use only first-class, certified materials.

The timeless design fits many interior styles and creates storage space in a modern way. Change the materials – matte lacquer, high gloss, noble veneer – or line up modules in the same finish. The joint of the front is repeated harmoniously on the top.

Choose from 22 basic modules in 3 heights and 2 widths. A sideboard always consists of at least one left and right exterior element. Between them, any number of slide in modules can be planned. Thereby each module can be determined individually in its design and can be created customized by different heights and base varieties.

The open compartments emphasize the visible and invisible storage space. They can be integrated in any position, tone on tone or with an accent color or veneer finish. The edge of the open compartment is beveled and blends in beautifully next to closed fronts. So you have important things quickly at hand – and nicely in view.

Nex Box – The handleless soloist.

With Nex Box we have designed a piece of furniture which enables an almost limitless expression of individuality. The incredibly wide variety of the Nex Box range offers the right solution for any wish, for any individual circumstances. Use individual boxes on their own or put them together to form ensembles, anything is possible from conservatively classic to creatively combined. In many expressive colors, with many different fronts featuring an ingenious interplay of lines, in many heights and widths and with many different leg options.

Nex Box is available with doors, drawers, flaps and open compartments for use individually or in combination. With an astonishing number of different widths, heights and versions. The more varied the composition, the more exciting the interplay of color, shape, material and size. The elegant aluminium overlay is a beautiful place to show your items and gives the box a touch of color since you can order it in any Piure matt lacquer color you please.

Nex box in version 'Veneer' is finished in wood all around. The open compartment presents itself with a fine, internal, 10 mm wide profile which is discreetly framed by the filigree 5mm wide border. Wherever you decide to place the piece – on its own, in a pair or in a group – you can select Nex Box in such a way that it always cuts a perfect figure. Plus the individual boxes are easy to move and use in different places thanks to their modular design.

Boxes can be mounted on the wall in creative arrangements. Contrasting inner colors make the open compartments especially beautiful.

Nex Glamour – Glamour meets simplicity.

Glamour “reflects” the combination of two worlds and creates a link between minimalist contemporary clarity and a bygone era of traditional glass and mirror art. This leads to enchanting furniture which juxtaposes glamour and simplicity, with each individual piece being unique and unmistakable. No surface resembles any other as each glass front is meticulously designed and crafted by hand, resulting in a piece of furniture which leaves a particularly luxurious impression. We produce Glamour in various pre-defined versions, available with higher and lower heights and in four striking colors.

Nex Wardrobe – Finesse doubling as storage space.

Nex wardrobe is a classic wardrobe that stands out for its very fine exteriors, respectively shadow gaps. The fine shadow gaps between the front elements and the perfect way of making, make the closet a particularly aesthetic object – in the dressing room or bedroom. The fronts are available in matt lacquer or high gloss and in all colors, as well as the fine angular handles or ledge handles.

You may choose the furniture without handles and thus achieve a particularly calm joint pattern. Or you can set subtle accents: Because you have the choice of two handle variants (ledge and angle), which are available in all matt and high gloss lacquers.

Shelves, interior drawers, pull-out shelves, clothes rail, clothing lift, mirror and lighting elements are available for the interior. Of course, there are numerous material, color and design variants for all program features.

Nex Shelf – The ease of beauty.

Lightness, elegance and finesse were also the attributes which guided us in designing Nex shelf – right down to the last detail. The Nex shelf includes elements which were defined by our designers. Align open elements and ones with a specifically designed front – drawers and doors – to suit your own taste, while taking practical considerations into account. Nex shelf comes in two depths, with five height elements and four width elements.

There is a height-adjustable shelf behind every door. The choice of doorstep is also up to you. With colored, lacquered inserts, surfaces can be particularly showcased.

Do you perhaps need compartments with greater heights to accommodate large-format picture books or a formidable vase? Then we recommend an element designed as an open compartment It extends across two compartment heights and is the ideal way to provide beautiful items with the space they require.

Fascinating compositions result when you use a combination of shelves with various widths as well as open and closed elements.

Flex – Exciting principle of order which reveals itself in the form of rhythm.

Flex offers the ideal frame for those wishing to compose their own individual and aesthetic principle of order. That's why Flex provides finished shelves with a fixed partition – which you can use and combine as you please. Alternate the various shelf elements and add other prepared elements to establish an exciting basic structure which you can use creatively.

The result is an extraordinary look with rhythmically divided fronts, a look which remains fascinating even after years have gone by.

The boxes are fixed inserts in the shelf. Boxes can protrude out of the shelf to two different degrees. Boxes which are flush with the front always take up two-thirds of the shelf width. Distinctive: the joint between the shelf elements.

Flex is also available in discreet heights: The shelf elements at a height starting from 76 cm.

Combined with also full-length doors, Flex offers many possibilities for storage space. The handleless fronts open with a light tap.

Link – Simply Design.

Most of our work spaces have an open design. The fewer walls there are, the more structuring elements we need. This is made possible by Link, the storage programme from Piure designed for use anywhere. Even in these digital times, we still need storage space. Including the option of locking things up tight. Link is so aesthetically appealing that one almost forgets how useful it is.

This modular system allows for two to five file heights for all kinds of combinations, and excels with its fine design and elegant reserve. Drawers, flaps, doors and open compartments are available as front variations.

The various element heights make Link a shelving and cupboard system which adapts uniquely to suit the desired application area. Each shelf element has room for eight files. So you can fit 40 files behind the tallest door combination. Two or three front variants are available, handleless or with handle because the handle variant can also be chosen lockable for all fronts.

Infinite possibilities – Virtual Reality with Piure.

All product variations and perspectives can be explored with our 3D configurators without delay and in real time. Color and design options can be changed at the click of a mouse. Your furniture design can be rotated as you wish, the fronts can be opened and you can try out our wide range of interior design options. The integrated price calculation and the configuration protocol allow a final, fast and detailed planning of your desired furniture with your furniture store.

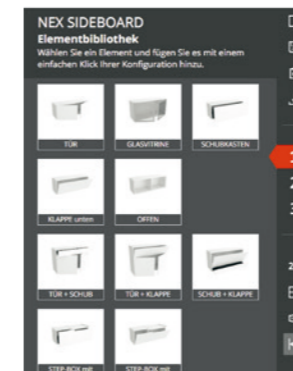

piure.de/en/konfigurator

CREATE YOUR DESIRED FURNITURE USING THREE SIMPLE CONFIGURATION STEPS:

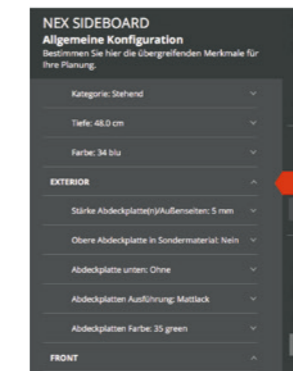

1

ELEMENTARY LIBRARY
Select an element and add it to your configuration with one click.

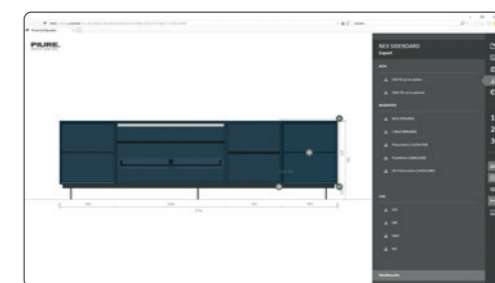

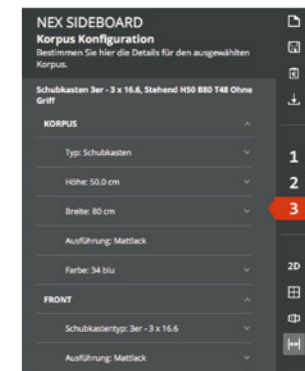

2

GENERAL CONFIGURATION
Determine the overarching characteristics for your planning here.

3

DETAIL CONFIGURATION
Define here the characteristics for the selected element (carcass, back panel, ...).

Quick Ship

With our Quick Ship collection, we offer a fine selection of modern Piure classics from our planning programs. The modular and timeless sideboards, dressers, shelves and cabinets are surprisingly priced and with you within 14 days.
